# PLACEMAKING

Placemaking is the process of creating a sense of place and community. It involves working with people to identify and address the needs and aspirations of a community. Placemaking is a collaborative process that involves working with people to create a sense of place and community. It involves working with people to identify and address the needs and aspirations of a community. Placemaking is a collaborative process that involves working with people to create a sense of place and community. It involves working with people to identify and address the needs and aspirations of a community.
